HITESH KUMAR

7067851135 | kumhit871@gmail.com | LinkedIn | GitHub | LeetCode |

SKILLS

- **Programming Languages**: Java, C++, Python, SQL
- **Core Competencies:** Data Structures and Algorithms, Operating Systems, Object-Oriented Programming (OOPs), Database Management Systems (DBMS)
- **Libraries / Frameworks:** NumPy, Pandas, Scikit-learn, LightGBM, SHAP, MLflow
- **Tools & Platforms**: AWS, Git, GitHub, Power BI, MySQL

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Amazon Web Services (AWS)
- Marketing Analytics — NPTEL

EXPERIENCE

AI & Cloud Technology Virtual Internship - Edunet Foundation ***Sept 2025 – Oct 2025***

- Completed a 4-week virtual internship focused on Artificial Intelligence and Cloud Computing through IBM SkillsBuild.
- Applied machine learning workflows, data processing techniques, and cloud-based platforms to solve real-world AI use cases.
- Gained hands-on exposure to cloud infrastructure, deployment models, and scalable AI integration practices.

EDUCATION

Vellore Institute of Technology, Bhopal ***Sept 2023 - May 2027***

- Bachelor of Technology in Computer Science and Engineering (BTech), **CGPA: 8.55**

PROJECTS

Customer Churn Prediction– [GitHub] – [Live Demo]

- Developed an end-to-end machine learning platform to predict telecom customer churn, analyze customer segments, and generate targeted retention strategies.
- Built a LightGBM classification pipeline with feature engineering, SMOTE balancing, and hyperparameter tuning achieving 0.821 ROC-AUC and 79% churn recall.
- Implemented customer segmentation using K-Means clustering and integrated SHAP-based explainability to identify churn drivers and provide actionable business insights.
- Technology: Python, Flask, Scikit-learn, Pandas, NumPy.

Medicine Recommendation System – [GitHub] – [Live Demo]

- Developed an ML-powered healthcare web application using Flask to predict diseases from user-entered symptoms and provide personalized recommendations.
- Built an SVM classifier to identify 41 diseases using 132 symptom features with machine learning-based prediction.
- Implemented recommendation modules for medications, precautions, diet plans, and workout suggestions using dataset-driven retrieval.
- Technology: Python, Pandas, Scikit-learn, LightGBM, SHAP, MLflow, Streamlit, Plotly.

Smart Inventory Management System – [GitHub]

- Developed a desktop-based inventory management system for product tracking, stock monitoring, and sales management.
- Implemented secure authentication and a real-time dashboard with insights on products, stock alerts, categories, and sales.
- Built sales management features with automated billing calculations and data visualization for revenue analysis.
- Technology: Java (Swing), MySQL, JDBC, JFreeChart.

ACHIEVEMENTS

- Solved 250+ DSA problems on LeetCode and GeeksforGeeks, covering arrays, trees, graphs, and dynamic programming.
